English

Tamil

PROFILE

To leverage my skills and expertise in software field to contribute effectively to software industry,utilizing my passionfor innovation and problem solving to drive success and achieve mutual growth

PROJECT

• Helmet and Number Plate Detection

The project on helmet and number plate detection uses computer vision to identify if a rider is wearing a helmet and to capture the vehicle's number plate. It aims to improve road safety and automate law enforcement.

• Diagnosis Malignant Melanomo Lesions

The project on diagnosing malignant melanoma lesions utilizes machine learning models to analyze skin images and accurately detect signs of melanoma. It aims to assist in early diagnosis, improving patient outcomes by identifying potentially dangerous skin cancer at an earlier stage.

SOFT SKILLS

- Adaptability
- Leadership
- Time Management
- Learning Agility

AREA OF INTEREST

- Web Development
- Machine Learning
- Artificial Intelligence
